

Forecasting Catastrophic Claimants

 Exclusive Predictive Technology

 Catastrophic Claimants

 Monthly Reporting

 Implement in 30-90 Days

Avert AI uses its **exclusive predictive technology** to generate monthly reports that identify potential **catastrophic claimants**.

Catastrophic claimants are plan members whose combined medical and prescription claims are projected to **exceed \$100,000** in the **next 12 months**.

With Avert AI plan sponsors can take **proactive measures** in managing healthcare costs by intervening early with **risk management strategies**.

This approach leads to **better health outcomes** and **reduced costs** for both the plan sponsor and the member.
